

# Maths Saves the Day! Kids Adventure App

Melbourne, Australia - Making maths fun for young children is no easy feat, but kids apps creator, GiggleUp, has done just that. Released today is Monkey Maths - Jetpack Adventure and as the name suggests, it entails a jetpack wearing monkey whizzing around and saving the day by answering a series of mathematical problems.

There is a background story - in a fun comic strip fashion, it tells of an evil villain threatening to collapse the maths world unless he can be stopped. This is where you and I come in. By correctly solving maths equations, we can help maths monkey advance in his quest to save his world. It is all in lighthearted fun, but at the end of the day, kids will no doubt increase their knowledge on addition, subtraction, multiplication and division.

A number of solid features have been built into the app - players can travel faster by buying special suits with game money that they collect when they pass a level. After failed attempts at the same maths question, the correct answer will be revealed. The game also supports progressive learning, so players start with the simple basics of addition and subtraction, then move on to the more advanced multiplication and division equations when they are ready.

Monkey Maths - Jetpack Adventure is a delightful maths game with a simple approach. It teaches maths in an engaging way and has enough variety to suit both beginners and more advanced learners.

Available for download on: App Store, Google Play and Amazon Appstore

## ABOUT GIGGLEUP

We are a team of designers and developers motivated by the same passion to create quality apps that can be enjoyed by kids and contribute to their learning. Our apps have received awards and recognition from various groups - among them are The Parents' Choice Foundation, Children's Technology Review, The New York Times and The Guardian. Some major areas of early childhood development our apps target include spatial reasoning, problem solving, first

words, number literacy, preschool science, and more. All our apps comes fully available in multiple languages. Our voice recordings are produced in-house and are performed by native speakers of the chosen language to ensure the highest quality and accuracy is achieved. We reside in the beautiful city of Melbourne, Australia, where our days are spent working away on the next new app, or enjoying a good cup of coffee.
