

Into the wild: Jigsaw puzzle fun for kids

Melbourne, Australia - GiggleUp today introduced the newest addition to its popular series of kids jigsaw puzzle apps. Wildlife Jigsaw Puzzles 123 features all new storybook-style illustrations and many new animals, while keeping the classic functions found in its past apps. Kids as young as 2 can play with more than forty customizable jigsaw puzzles and learn the names of their favorite animals along the way.

This app is designed to support independent learning and play. Kids can jump straight into the fun without having to navigate through complicated menus. Players choose from seven wildlife scenes then tap on any animal to start playing. Once the puzzle pieces are put together, the name of the animal appears on screen and is read aloud by a friendly voice-over.

Key features in Wildlife Jigsaw Puzzles allows children to play and learn at their own pace with little parental assistance. The hint on/off button reveals the completed picture for a short time while pressed. Puzzle pieces can also be customised to 2-piece, 4-piece, 6-piece, 9-piece and 16-piece puzzles to suit players of various ages.

Jigsaw puzzles have long been recognized to assist with improving motor skills important in early childhood development. They are also a fun way for kids to practice concentration and memory. Combine this with the interactivity of mobile devices, this app provides an enriching learning experience that is fun for kids.

Narrated by local speakers, it is available in English, French, Spanish, Japanese, German, Swedish, Russian, Dutch, Portuguese, Norwegian, Danish, Korean, Chinese and Italian.

Available for download on: App Store, Google Play and Amazon Appstore

ABOUT GIGGLEUP

We are a team of designers and developers motivated by the same passion to create quality apps that can be enjoyed by kids and contribute to their learning. Our apps have received

awards and recognition from various groups - among them are The Parents' Choice Foundation, Children's Technology Review, The New York Times and The Guardian. Some major areas of early childhood development our apps target include spatial reasoning, problem solving, first words, number literacy, preschool science, and more. All our apps comes fully available in multiple languages. Our voice recordings are produced in-house and are performed by native speakers of the chosen language to ensure the highest quality and accuracy is achieved. We reside in the beautiful city of Melbourne, Australia, where our days are spent working away on the next new app, or enjoying a good cup of coffee.
