

The All-in-one Game for Enjoyable Learning

Melbourne, Australia - Creators of children's educational apps, GiggleUp, has today announced the release of a mobile game that will allow kids to improve their knowledge on subjects like letters and advanced counting, in a fun and non-stressful way.

Dot-to-dot Adventure uses a game environment where players connect the dots in the right sequence in order to finish the puzzle. Similar to the classic game we all played with pen and paper growing up, this app offers a lot more, thanks to the interactive abilities of a mobile device. Kids are treated to fun, simple animations and there is a clever points system that rewards achievements while acting as an incentive to try harder in weaker areas.

The most impressive side of Dot-to-dot Adventure, however, is the vast array of play and learning options available to parents. There is almost nothing you can't do when it comes to player-specific settings customization. The game comes with a inbuilt default settings in accordance with curriculum standards - simply set the player's age and start playing straight away! As every child has different needs, the game allows you to select exactly what area of learning you want and if he or she require any assistance in the form of hints and answer-help.

This delightful game helps to educate kids specifically in the area of letters and numbers - including skip counting in multiples. Best of all, it allows you to save up to four players at any one time, and with fully customizable player settings, it is perfect for the family with kids ranging from preschool to elementary school. Take a shot in learning the alphabet in a foreign language! Dot-to-dot Adventure comes available in English, Danish, French, German, Italian, Japanese, Korean, Russian, Simplified Chinese, Spanish, Swedish, and Traditional Chinese.

Available for download on: App Store, Google Play and Amazon Appstore

ABOUT GIGGLEUP

We are a team of designers and developers motivated by the same passion to create quality apps that can be enjoyed by kids and contribute to their learning. Our apps have received awards and recognition from various groups - among them are The Parents' Choice Foundation, Children's Technology Review, The New York Times and The Guardian. Some major areas of

early childhood development our apps target include spatial reasoning, problem solving, first words, number literacy, preschool science, and more. All our apps comes fully available in multiple languages. Our voice recordings are produced in-house and are performed by native speakers of the chosen language to ensure the highest quality and accuracy is achieved. We reside in the beautiful city of Melbourne, Australia, where our days are spent working away on the next new app, or enjoying a good cup of coffee.
