

GiggleUp Renovates Kids Shape Puzzles App with Helpful Features

Melbourne, Australia - More than just a puzzle game, this latest app by GiggleUp seeks to give young children endless opportunity to learn about the world around them during the prime of their curiosity. Awesome Shape Puzzles 123 works like a picture dictionary consisting of more than 150 everyday words with the added value of a shape puzzles game to develop important learning and problem solving skills.

Connecting an image with a sound is one of the most natural and effective ways to learn. Parents commonly point to an object while saying its name and then encourage their child to repeat it out loud. In this kids app, each original drawing is accompanied by a friendly and clear voice guide that teaches the child about the names of different everyday objects.

The play mechanics are straightforward and easy to grasp, so that children as young as two will have no trouble having a go on their own, while smaller toddlers may benefit from some parental guidance. Multiple play modes caters to the different learning needs of children between the ages of 1 and 6. The 'single piece' mode allows young toddlers to drag missing whole objects to their correct places. Switch to the 'easy puzzle' play mode for beginner shape puzzles (2-4 piece), and 'hard puzzle' (7-10 piece) for the bigger kiddies who are up for a challenge!

Additional games, such as Balloon Pop! and a fun stickers collection creates delight and merriment all round as players are rewarded for their hard work after completing the puzzles.

Why stop at learning words in English? With multiple languages to choose from, including English, Bokmål, Norwegian, Danish, Dutch, French, German, Italian, Japanese, Korean, Portuguese, Russian, Chinese, Spanish and Swedish - all recorded by native speakers - parents can join their kids in learning exciting new words together.

ABOUT GIGGLEUP

We are a team of designers and developers motivated by the same passion to create quality apps that can be enjoyed by kids and contribute to their learning. Our apps have received

awards and recognition from various groups - among them are The Parents' Choice Foundation, Children's Technology Review, The New York Times and The Guardian. Some major areas of early childhood development our apps target include spatial reasoning, problem solving, first words, number literacy, preschool science, and more. All our apps comes fully available in multiple languages. Our voice recordings are produced in-house and are performed by native speakers of the chosen language to ensure the highest quality and accuracy is achieved. We reside in the beautiful city of Melbourne, Australia, where our days are spent working away on the next new app, or enjoying a good cup of coffee.
