

# Explore the Animal Kingdom with New Kids App

Melbourne, Australia - The latest title by kids app developer, GiggleUp, encourages children's fascination with animals with a series of mini games designed to entertain and educate.

Who Lives in the Forest? is an app designed for young children to explore animals and science in a way that is exciting, engaging, and easy to understand. It features eight fun games based on the special characteristics of forest-dwelling animals, including how they get their food, where they live, their life-cycle, and more. A slideshow featuring lively illustrations and fun facts about each animal is another great way to create discussion and encourage further learning.

The simple interface and intuitive gameplay make this app ideal for young children, but don't be surprised if mom or dad wants to have a go too!

Available for download on: App Store, Google Play and Amazon Appstore

## ABOUT GIGGLEUP

We are a team of designers and developers motivated by the same passion to create quality apps that can be enjoyed by kids and contribute to their learning. Our apps have received awards and recognition from various groups among them are The Parents' Choice Foundation, Children's Technology Review, The New York Times and The Guardian. Some major areas of early childhood development our apps target include spatial reasoning, problem solving, first words, number literacy, preschool science, and more. All our apps comes fully available in multiple languages. Our voice recordings are produced inhouse and are performed by native speakers of the chosen language to ensure the highest quality and accuracy is achieved. We reside in the beautiful city of Melbourne, Australia, where our days are spent working away on the next new app, or enjoying a good cup of coffee.
